

ATHAVAN YOKANATHAN

Toronto, ON | (437) 410-7970 | athavanyokanathan4@gmail.com | [linkedin.com/in/athavan-yokanathan](https://www.linkedin.com/in/athavan-yokanathan) | github.com/Athavanyy

JUNIOR DEVELOPER • Client Side Development | Cloud Platform Deployment | RESTful Web Service

PROFILE

Software Engineering Technology student and full-stack developer with hands-on experience building responsive, user-friendly web applications using React, Node.js, and Express. Comfortable across the full development lifecycle — from requirements and database design through deployment on AWS/Heroku with CI/CD pipelines. Strong debugger and problem-solver who works well in Agile teams and has led database and mobile-app projects from concept to delivery.

TECHNICAL SKILLS

Languages: JavaScript, Java, C#, SQL, HTML5, CSS3

Frameworks: React, Node.js, Express.js

Tools: Git, Visual Studio Code, Postman, AWS CLI, Jira, Figma, Adobe Creative Suite

Cloud & Deployment: AWS, Heroku, CI/CD Pipelines

Concepts: RESTful APIs, Agile/Scrum, SDLC, Data Modeling & Management, Software Requirements (SRS/SSD), Testing & QA

SOFT SKILLS

Team Leadership • Problem Solving & Debugging • Technical Documentation & Communication • Cross-Team Collaboration • Adaptability

EDUCATION

Software Engineering Technology, Advanced Diploma Jan. 2022 – Present

Centennial College, Toronto, ON | GPA: 3.64/4.5

Relevant Courses: Database Concepts (SQL), Java Programming, Advanced Object Oriented Design, Web Interface Design, JavaScript (JS), Unix/Linux OS, Client-Side Web Development, Web Application Development, Testing & QA, Software Requirements, Data Modeling & Management, C# Programming

SOFTWARE ENGINEERING PROJECTS

Centennial College | Toronto, ON

StudyLink — Campus Study Group Matcher

- Designed and developed a full-stack study group matching platform for college students, pairing users by course, schedule availability, and learning style using a custom matching algorithm.
- Built a React front-end with real-time group chat and shared session scheduling, integrated with a Node.js/Express REST API for live availability syncing.
- Collaborated in an Agile team environment, running sprint planning and demos to iteratively refine matching logic and UI based on user feedback.

EmberAlert — Wildfire Risk & Evacuation Notifier

- Developed a real-time wildfire risk notification system that ingests live weather and wind data to calculate and flag rising risk levels by region.
- Built a Node.js/Express backend with RESTful API integration for continuous data feeds and push-style alerts to affected users.
- Designed an interactive risk-level map front-end, visualizing danger zones and evacuation routes to support faster public response.

Clinic Scheduler — Patient Appointment & Records System

- Led a team in designing a normalized relational database schema for patient records, appointments, and provider availability.

- Developed stored procedures to prevent scheduling conflicts and automate appointment reminder queries, improving booking reliability.
- Managed the project through the full lifecycle — requirements gathering, schema design, QA testing, and deployment — using Agile/Scrum practices.

INTERESTS

- Open-Source Development & Code Collaboration: Contributing to front-end development and conducting peer code reviews for Superstar Rabbits, an open-source web game project with a global team of 22+ contributors
- Digital Media Production & Visual Design: Engaging graphics and video content for social media and promotional use, providing volunteer creative services to local businesses and community organizations
- Interactive Entertainment & Gaming Communities: Participating in multiplayer, strategy, and simulation gaming environments, with active involvement in community events and team-based gameplay
